

SEAWATER PRO

22"

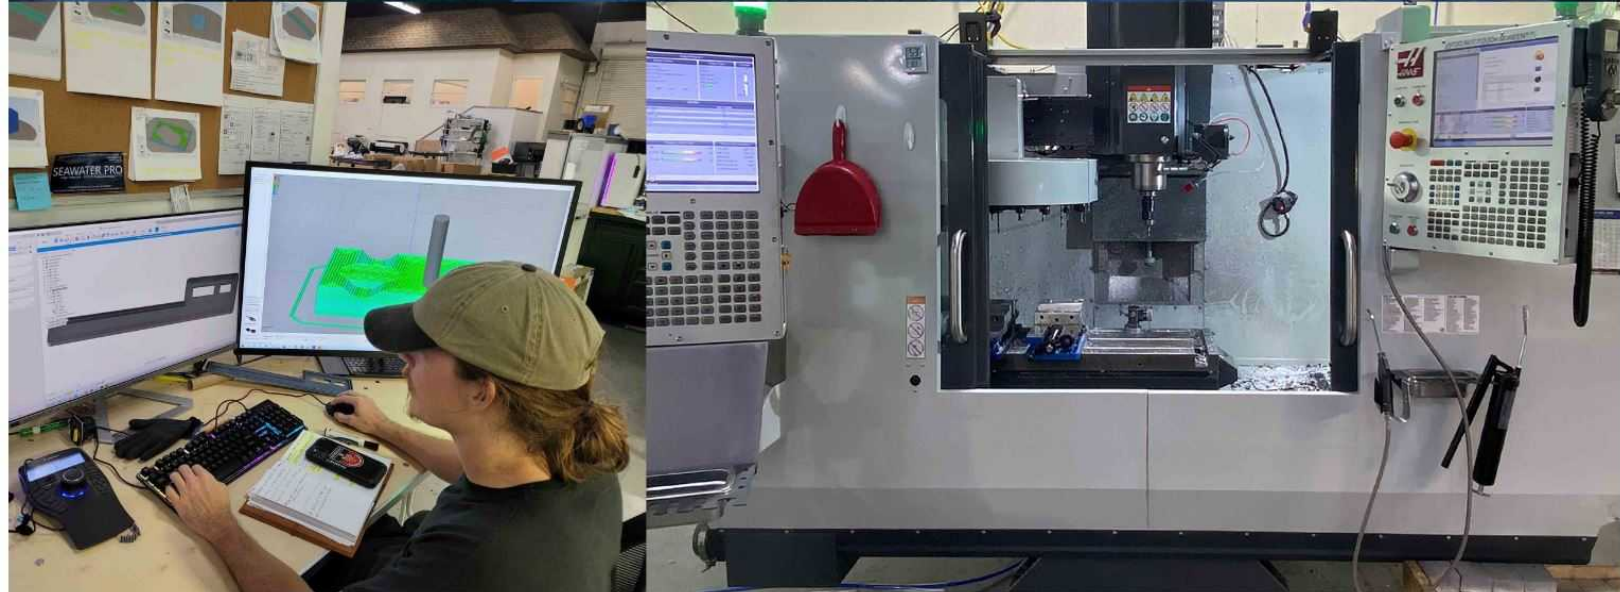

WORLD'S FIRST LITHIUM PORTABLE

Will desalinate seawater, purify river, lake, standing or bore water. Can be used as primary or redundancy on your yacht or small dinghy or ditch bag for your life raft. Perfect for Boat, RV and camping. 22 x 14 x 9 in" / 600 x 350 x 230 mm (Airline carry-on size). 45 LBS / 20 KG with battery.

Battery will last 3.5 hours per charge at 8 GPH ! Sealed water-tight battery compartment. USB adjustable from 8 to 12 GPH. 280 to 350 watts USB programable RPM. 90 to 240 VAC continuous operation power supply included. 12 Volt mini inverter included, optional 24 Volt. Both motors are waterproof and brushless (BDLC). All components are waterproof! Accepting Pre-orders, ~60 day delivery. Call or email to Pre-Order. Video and detailed pictures coming soon.

Model	Amp/Watts	Power Options	GPH / LPH	Net Weight	Price
P200-L	300W	100-240VAC / 12VDC	8 - 12 / 30 - 45	45 lbs / 20 kg	\$5995

We are one of the very few companies that have our own CNC machinery for manufacturing stainless parts, 3D printers for printing plastic parts and our own CAD design software and team to design and create all of our innovative ideas.

Everything is handled internally by SeaWater Pro, many companies who are competitors of ours purchase critical components from other manufacturers and all they do is assembly.

We don't believe it's possible to innovate that way. You can't innovate when you don't control your manufacturing. We make our own pressure regulators and CNC our control panels. We are not dependent upon somebody else inventing something new. So when we came out with the world's first lithium powered portable watermaker we were the only thing out there, nobody had anything like it, to this day really nobody has anything to compete with us. We are years ahead of the competition and we have the most simple and reliable line of watermakers.
